

**Information Exchange** — establishes a Bluetooth wireless connection between two devices so that they can exchange personal information manager data such as business cards, calendar items, email messages, and notes.

**Information Synchronization** — establishes a Bluetooth wireless connection between two devices and uses the connection to synchronize Personal Information Manager data between the two devices.

**Network Access** — establishes a Bluetooth wireless connection between the client and a server that is physically connected to the Local Area Network. If the client has permission (user name and password for the LAN), the wireless connection can be used as if the client were hardwired to the LAN.

**Audio Gateway** — allows a remote Bluetooth device to use this computer's microphone and speakers as the remote device's audio input and output devices.

**Printer** — allows a Bluetooth Client to use a Bluetooth printer.

Bluetooth USB Dongle Quick Start Guide	In box
Bluetooth USB Dongle CD-ROM	In box
Bluetooth Application Software	On CD
Bluetooth USB Dongle User's Guide	On CD

If any item is missing, please contact your product provider.

### PRODUCT INTRODUCTION

The Bluetooth USB Dongle allows a computer with a USB port to communicate with other Bluetooth-enabled devices. When used with the Bluetooth application software, it can perform wireless network applications such as information exchange, file transfer, network access, dial-up networking, headset, audio gateway, printer application, and so on.

### SYSTEM REQUIREMENTS

- Processor: Intel Celeron / Pentium III / Pentium IV; AMD Duron / Athlon
- Operating System: Microsoft Windows 2000/XP/VISTA
- System memory: 32MB at least
- Hard Drive Space: 11.5MB

#### 1. Installation

- ① Put driver into CD-ROM, and system will run the software automatically.
- ② System prompt to select language
- ③ Click "next" → "yes" → "next"
- ④ System install software.

#### 2. Start BlueSoleil™

After installing BlueSoleil™, there are two ways to start the program:

1. A BlueSoleil™ shortcut icon on the Windows desktop.

2. An IVT BlueSoleil™ program group entry in the Windows' **Start | Programs** menu. Double-click the BlueSoleil™ shortcut icon on the desktop or click the BlueSoleil™ menu item on the **Start | Programs | IVT BlueSoleil™** menu to start the BlueSoleil™ software. The BlueSoleil™ icon will be displayed at the bottom right corner of the Windows desktop

## 2.1 Exit BlueSoleil™

To exit BlueSoleil™, right-click the BlueSoleil™ icon at the bottom right corner of the Windows task bar and select **Exit** on the pop-up menu.

**Note:** Selecting the **Close** button at the top right corner of the BlueSoleil™ window only hides the BlueSoleil™ window.

## 2.2 BlueSoleil™ Main Window

The BlueSoleil™ Main Window displays all surrounding Bluetooth devices. From the BlueSoleil™ Main Window users can search for surrounding Bluetooth devices and can execute connect/ disconnect functions.

The main elements in the BlueSoleil™ Main Window are:

- My Device Icon
- Remote Bluetooth Device Icons
- Bluetooth Service Icons

## 2.3 My Device Icon

This icon represents the client computer. It is called the My Device icon or center ball in this document.

### Functions:

- Hover the mouse over the My Device icon to display the client Bluetooth device name and address.
- Double-click to start/stop searching for surrounding Bluetooth devices.
- Drag scrollbar on the right of main window to find other Bluetooth devices if there are more than seven devices.
- Right-click to display the pop-up menu with related operations.

The following colors are used to indicate the status of the Bluetooth service:

- White (Idle)
- This is the normal status.

- Pink (Available)

The Bluetooth service is available for the selected device.

- Yellow (Selected)

The service icon has been selected by the user.

- Green (Connected)

The service is connected.

### Functions:

- Hover the mouse over the icon to display the service name.
- Single - click to select the service.
- Double - click to connect.
- Click to display the pop-up menu with related operations.

## 2.4 Start/Stop a Bluetooth Service

Select a service icon in service window, and double - click to start / stop a service or select right popup menu to send command.

## 2.5 View the Property of a Service

Right - click to display the pop-up menu with related operations in service window.

2.5 What You Need To Do Before Building A Connection

3. Inquiring Bluetooth Devices in the vicinity

4. Pairing your desktop or laptop with the associated device

## 2.6 Pairing your desktop or laptop with a Bluetooth Device

Double click the remote Bluetooth device you want to connect and you will be asked to enter the Bluetooth Passkey. Please type the Bluetooth Passkey in the Passkey field. Meanwhile, there will be a Bluetooth Passkey dialog box prompted on the remote laptop or desktop equipped with the Bluetooth device to ask you to enter passkey. The Bluetooth passkey should be the same between paired devices. If the pairing process succeeds, there will be a red check on the paired Bluetooth device icon.

## 2.7 Services Supported:

**Bluetooth Serial Port** — establishes a Bluetooth wireless connection between two devices. The connection may be used by applications as though a physical serial cable connected the devices.

**Dial-up Networking** — allows a Bluetooth client to use a modem that is physically attached to the Bluetooth server.

**Fax** — allows a Bluetooth client to wirelessly send a fax using a device that is physically attached to the Bluetooth server.

**File Transfer** — establishes a Bluetooth wireless connection that allows your computer to perform file system operations on another Bluetooth-enabled device—browse, drag / drop, open, print, cut / copy, paste, delete, rename, etc.

**Headset** — allows a Bluetooth client to use a Bluetooth headset as the audio input and output device for this client.
