Setup Steps for Win98, SE and ME user

You need to setup the Device with driver on CD-ROM we provide in the package.

Here are the steps:

1. Finish the first four steps as above

Note. If your windows OS can't find the device automatically, you need to activate it manually.

Step 1. Double click the "My computer" icon to open the window.

Step 2. Double click the Control panel to open it.

Step 3. Double click the Add new Hardware icon

Step 4. Select the Universal Serial Bus controller in the hardware list and Click "Next>".

2. Put the CD-ROM into the CD-Drive

1. This CD will Auto-run, please wait. If not, double click the CD-drive icon in My Computer Window.
2. Follow the Software to install Driver and utilities (5.1CH Virtual sound).
3. The PC will **reboot** when the installation completes.

What is Sound Effect?

Using Sound Effect to create the 5.1 Channels sound simulation with earphone, so you can enjoy the effect without using a set of speakers. It not only saves your money but also saves your time to setup the speakers.
